

Technical data sheet

Height-adjustable, decouplable cassette for inspection opening, stainless steel
Item number: 7409601

Height-adjustable and decouplable square cassettes are suitable for flushfloor device installation in UGD-3 underfloor connection boxes. Depending on the design, they are suitable for dry, moist or wet-cleaned floors. The cassette rests on the fixing bracket fastened in the top frame of the box, using which the cassette can be adjusted to the top edge of the floor covering. The fixing bracket decouples the cassette from the raw ceiling. The connection socket must have an appropriate installation opening and, for this reason, needs a blanking lid with an appropriate installation opening. The cassettes are made from stainless steel or brass. All the cassettes contain a 4 mm thick sheet steel plate, for safe absorption of the traffic loads. Suitable cassettes are available for different floor covering thicknesses of 20 and 25 mm. Only suitable for smooth floor coverings. Height-adjustable cassette with blanking cover. The scope of delivery contains an aluminium screed protection cover (grindable), a suitable mounting lid to fix the cassette lined body and an ISO apron for decoupling from the underfloor connection socket.

A2 Stainless steel

Master data

Item number	7409601
Type	TRKN 9 VS 250
Description 1	Square cassette seamless floor
Description 2	rectangular, blank
Manufacturer	OBO
Dimension	243x243x83
Material	Stainless steel
Smallest sales unit	1
Unit of quantity	Piece
Weight	724.2 kg
Weight unit	kg/100 pc.
